

App Guide

[DE](#) | [EN](#)

Download the eCarUp app

Download the eCarUp app onto your mobile phone and create an account.

Search

Search a station on the "Map" or "Nearby". You can also tap on the "Filter" under "Map" on the left and filter by connectors, performance and include partner stations.

Charge

Tap on the desired EV charging station to find out its location, power and prices. Activate a charging station by tapping the "activate" button and then entering the desired duration.

You can also activate a charging station without our app. For this you must connect an RFID or NFC tag to your account. This only works with RFID-enabled charging stations.

Pay

Enter your credit card details under "Account". You will receive a receipt immediately after charging.

Download the App
